

# The Kia Niro.

Movement that inspires

## Three exciting answers to today's needs.

Cleaner environment and a passion for stylish driving. The Niro range meets individual needs with a versatile crossover design filled with inspiring technology and plenty of space. It's available as a Self-Charging Hybrid, a Plug-In Hybrid and a zero-emission EV. There is only one question: which Niro appeals to your greener side?

Images shown are for illustrative purposes only and not to UK specification. Features are not necessarily standard across the range.

## SELF-CHARGING HYBRID

# A bold way to go green.

The Niro Self-Charging Hybrid is made for all those who want to do their bit for the environment without compromising on power or great looks, you'll notice the double arrow-shaped LED daytime running lights and dynamic grille design. The interior is finished with refined materials and sophisticated technology: the one-piece dashboard seamlessly integrates the high-tech cluster and the high-definition 10.25-inch navigation touchscreen.

**Navigation system.** The navigation & multimedia system takes user experience to the next level. With its split-screen function, it can display two different applications at the same time. For instance you can decide to display navigation information together with your choice of music. Whatever you choose, it's all in one beautiful frameless 10.25-inch screen.

**Cluster.** The 7-inch supervision cluster features a digital speedometer and unique visuals. It allows you to monitor crucial statistics like current driving mode, battery charge and remaining range. You can customise it depending on the kind of information you want displayed.

## PLUG-IN HYBRID

# For the best of both worlds.

If you like the best of both worlds, a place where performance and low running costs coexist in perfect harmony, then the Plug-In Hybrid is a great bet. It has battery that can be recharged externally and allows you to drive up to 30 miles\* in electric mode, making it perfect for most daily commutes.

**Charging port.** Enjoy convenient charging via a homecharger or public charging station. The Niro Plug-In Hybrid is able to fully recharge on a 3.3kW charger in approximately 2 hours 15 minutes.

**In-cable control box.** The Niro Plug-In Hybrid's cable for use with a regular UK three-pin socket is equipped with an in-cable control box. The colour display on the cable indicates the battery charging status, so you can easily monitor progress.

**HEV/EV switch button.** You can prioritise between electric and hybrid mode at the touch of a button located on the centre console. In EV mode the Niro Plug-In Hybrid prioritises electric-only driving.\*\* In HEV mode, it might call on either or both energy sources, switching between using the petrol engine only, the battery only, or both depending on the situation.

**Dual-mode paddle shifters.** Paddle shifters bring unique functionality to the Niro Self-Charging Hybrid and Plug-In Hybrid. While in Eco mode, the paddle shifters can be used to control the regenerative braking system. Switch to Sport mode and the paddle shifters allow the driver to quickly downshift or upshift, providing a sportier driving experience.

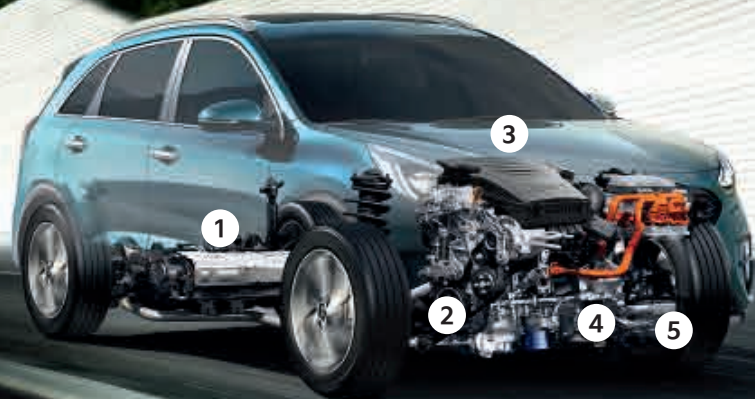

\*Based on combined WLTP cycle.

\*\*There are certain situations in which the petrol engine will automatically activate even when the vehicle is in EV mode. Examples may include: when the hybrid battery state of charge is reduced to a certain level, when acceleration demand is high and/or when it is required to heat up the cabin.

# Eco-friendly driving.

Both the Niro Self-Charging and Plug-In Hybrids employ a parallel hybrid system that switches between petrol and electric power, or uses a combination of both. The system charges the battery whenever it can. Unlike conventional hybrids, the parallel system keeps energy loss to a minimum as the full output of both engine and electric motor is transferred through the transmission in a parallel system.

## 1. Lithium-ion polymer battery

Durable and lightweight, the 1.56 kWh (Self-Charging Hybrid) and 8.9 kWh (Plug-In Hybrid) lithium-ion polymer battery efficiently controls electrical energy and cools more effectively. Safely positioned below the rear seats, the battery comes with a 7-year warranty.

## 2. Regenerative braking system

Kinetic energy produced when decelerating or coming to a stop is captured to recharge the battery.

## 3. 1.6 GDi engine with 139bhp combined max. power

This 1.6 GDi engine generates 104bhp and a peak torque of 27 kg.m at 4,000 rpm - the perfect match for the Niro's hybrid system. All told, the system offers a combined maximum output of 139bhp.

## 4. Permanent magnet electric motor

Providing up to 56bhp on its own, the electric motor also assists the petrol engine in hybrid mode, and recharges the battery during deceleration.

# The new Niro is sculpted and streamlined.

## 5. Smooth 6-speed DCT

A 6-speed DCT (Dual Clutch Transmission) transfers engine/motor power efficiently, and delivers dynamic drivability with fast shift response and direct feeling.

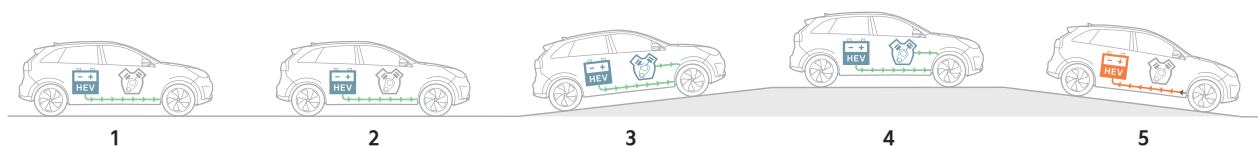

## 6. Low rolling resistance tyres

To travel the most distance for every litre of fuel, the tyres are designed for low rolling resistance, so they occasion less energy usage with every revolution.

## 7. Underbody aerodynamics

Out of view, the drivetrain, chassis, exhaust and exposed body elements are designed to create the least possible drag as the Niro moves forward.

## Efficient Driving Mode

### 1. Launch (Pure EV)

When starting out from a stop, the hybrid system relies entirely on power from the electric motor. This helps reduce fuel use in stop-and-go traffic.

### 2. Gentle Acceleration (Pure EV)

During mild acceleration, the system also uses power exclusively from the electric motor. It has ample pickup to help you increase your speed.

### 3. Full Acceleration

When accelerating harder, the petrol engine works together with the electric motor to get the Niro up to the desired speed.

### 4. Cruising

When cruising at relatively constant speeds, the system goes into power-assist mode, where the petrol engine is the main source of drive power.

### 5. Deceleration

The system's regenerative braking takes advantage of every decrease in vehicle speed, capturing energy and storing it in the battery for future use.

**Active air flap.** An active air flap behind the grille cools the engine. It closes at higher speeds to reduce drag for better performance and fuel efficiency.

**Rear diffuser.** A spoiler panel below the rear of the Niro is sculpted with longitudinal ridges for stability and aerodynamic control.

**Rear spoiler.** A rear spoiler takes advantage of airflow to help stabilise the car when travelling at speed.

ELECTRIC

## Forward thinking for smarter driving.

The e-Niro is proof that electric vehicles have come a long way. This stunning crossover is equipped with all the latest technology to make electric driving both convenient and enjoyable.

## EV power, pure crossover style.

The e-Niro adds heaps of style and excitement to eco-friendly driving. Offering a 282-mile range and fast-charging abilities, it marks a major step in electric powertrain technology. As a true crossover, it pairs advanced technology and comfort with a spacious 451-litre boot. The e-Niro comes with many individual touches, starting with the aerodynamic, closed front grille featuring a striking diamond pattern and an integrated charging socket. The striking arrow-shaped daytime-running lights, as well as the bumpers and 17" alloy wheels, also feature a design unique to e-Niro.

**Drive Mode Select.** The e-Niro lets you select your favourite driving style. Four drive modes - ranging from the highly efficient Eco+, to Eco, Normal and the more dynamic Sport - allow you to adjust the crossover's performance and energy consumption.

**Regenerative braking.** The e-Niro offers next-generation regenerative braking. For your convenience, it allows you to choose between different regenerative braking modes to suit the conditions. Select single-pedal driving by holding the left paddle behind the steering wheel for a minimum of 0.5 seconds. By holding the paddle, the car can decelerate to a standstill without using the brake pedal. On releasing the paddle or by activating the right paddle shift lever, the system returns to regular mode. It's convenient, minimises the wear and tear on your brakes, and increases the battery range.

**Ambient light.** For the perfect atmosphere: the ambient light offers a choice of six colour settings to suit your mood.

**Electronic parking brake.** Say goodbye to cumbersome levers. A touch of a button is all you need to activate the parking brake.

The e-Niro interior is all about individual style. It can be fitted with blue trim combined with leather upholstery to match the exterior highlights, while ambient lighting sets the scene. In the cockpit, the one-piece seamless dashboard grabs the attention. It integrates the high-tech cluster and the sleek high definition 10.25-inch navigation and multimedia widescreen. Plus, in true next-generation electric vehicle style, a rotary driver selector replaces the traditional gearstick.

# Electric driving, full of excitement.

The key to electric mobility is technology that simply performs well, with all the comfort you need for every journey.

**Battery.** The e-Niro comes with a choice of battery to suit individual preferences. The 64 kWh battery is designed for longer-distance journeys of up to 282 miles. It can be recharged from 0% to 80% in only 54 minutes using any charger offering a speed higher than 80 kW. If you mainly drive in the city, choose the 39.2 kWh battery pack with a 180-mile range.

**Motor.** Combined with the long-range battery, the 150 kW motor accelerates from 0 to 100 km/h in 7.8 seconds.

**Heat pump.** The optional heat pump helps save energy and therefore battery range, in particular at temperatures below 10° C and while using air conditioning.

**Battery heating system.** The battery pack situated underneath the e-Niro is equipped with a battery heating system that can be controlled from the touchscreen. It warms up the battery floor in colder temperatures to ensure a smooth engine start. It also helps reduce loss of battery charge overnight due to cold weather conditions.

**Programmable charging.** Use the touchscreen or the Kia Connect mobile app to set the time to recharge your Kia e-Niro, e.g. if you want to take advantage of cheaper night-time tariffs.

Images shown are for illustrative purposes only and not to UK specification. Features are not necessarily standard across the range.

# Public charging made easy...

## Anxious about using multiple apps and accounts for charging across different public networks?

Worry not, Kia Charge gives you access to the vast majority of UK public charging networks including bp pulse, Pod Point, Source London, Instavolt, Shell New Motion, Osprey, Char-gy, IONITY and more. In addition, it works in 28 other European countries in exactly the same way as it does in the UK so you can travel long distance without any worries\*.

## The only app you need

You can start charging using either the app or dedicated card. And you don't have to make any payment on site: Everything is handled as part of a monthly, itemised billing process.

## Reliable, up-to-date information

You have all information at your fingertips. You can apply a range of filters to find the right station, with up-to-the-minute information about availability and pricing.

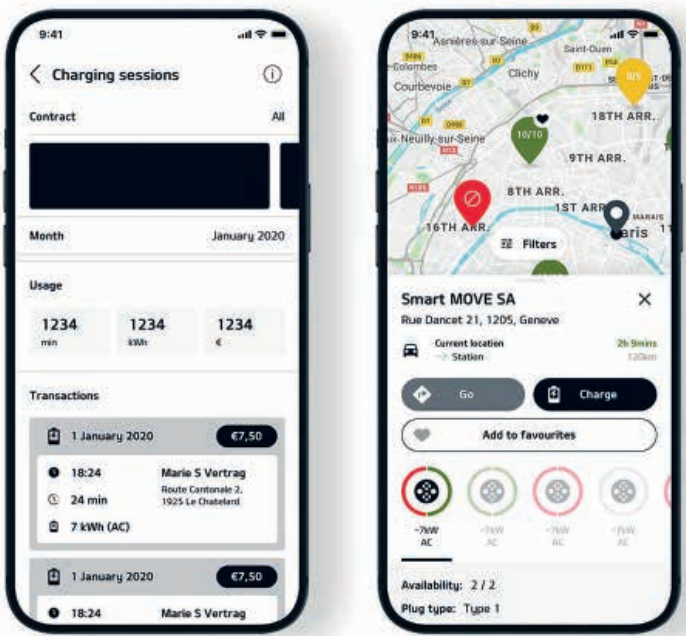

## Transparent pricing with monthly payment

There are two base tariffs to choose from. 'Easy' is a no-commitment tariff for light users of public charging while 'Plus' is for those who tend to charge away from home more often.

## Best value with a range of bolt-on subscriptions including IONITY

You can add up to two bolt-on subscriptions - for bp pulse and/or IONITY - to benefit from the best value possible when charging within these networks.

For more information, visit [kiacharge.com](https://kiacharge.com) or download the mobile application.

\*Charging outside of the UK is subject to the visited country's Easy tariff, regardless of your UK subscription. Kia Charge and KiaCharge.com/gb are offered by Digital Charging Solutions.

# Kia Connect (UVO)...

## Your free seven-year connected services.

Kia Connect (UVO) opens your Kia to the world of connected services. Once activated, it enables a number of essential digital features in your car. You can also install the Kia Connect app on your smartphone and pair it with your Kia to control certain functions remotely and consult a wealth of information about your car.

### In-car services

**Your free seven-year Kia Connect (UVO),** once activated, uses your vehicle's embedded SIM card to connect it to the world of live data.

#### Real-time traffic information

Your navigation system uses live traffic information to recommend the best route and dynamically predict the most accurate arrival time.

#### Speed cameras and danger zones

Be alerted to speed and traffic light cameras, and to areas where accidents are particularly common.

#### Weather information

With up to three days' weather forecast available, you can check weather conditions at your destination.

#### Destination search and points of interest

Are you looking for a place to eat, a local business or the nearest ATM? All this information and more is easily accessible via your Kia's live, connected directory.

#### Parking

Kia Connect (UVO) helps you find available parking locations. It shows on- and off-street parking locations, including prices and likely availability.

#### Fuel station information

The system shows you the nearest petrol stations and prices to plan a refuelling stop.

#### Charging station information (electric and plug-in hybrid vehicles only)

Your car gives you the location of charging stations, with useful information such as availability and charging speeds available.

Android Auto™ is designed to keep you perfectly connected to your phone while minimizing distractions so you stay safe on the road. The simple, intuitive interface lets you access features like Google Maps, apps, music and voice control, and automatically organizes info into simple cards that appear just when they're needed.

Apple CarPlay™ is a smart, safe way to use your iPhone while driving. It takes all the things you might want to do, and puts them into your display, so you can get directions, make a call and listen to music all while staying focused on the road.

### Mobile application services

**Once Kia Connect (UVO) is activated in your Kia,** it gives you access to a wide range of useful functionalities through the Kia Connect mobile phone application (available on Apple™ and Android™).

#### Find my car and first/last mile navigation

Check the location of your car and let the app guide you to it. When parking before reaching your destination, your app can give you guidance to walk the last bit of the way using augmented reality or Google Maps.

#### Vehicle status

The app gives you an overview of your Kia's status including fuel/battery level, doors, windows, bonnet or tailgate and lets you know of any malfunction. You can also view your past trips and get stats for your past month's driving.

#### Notifications and remote door control

You get warned if your vehicle's anti-theft alarm is triggered or if you left your doors unlocked. What's more, you can lock and unlock doors from your phone, wherever you are.

#### User-profile-linked vehicle settings

Select your preferred vehicle settings from your phone for a tailored experience once you get behind the wheel and select your profile.

#### Valet mode

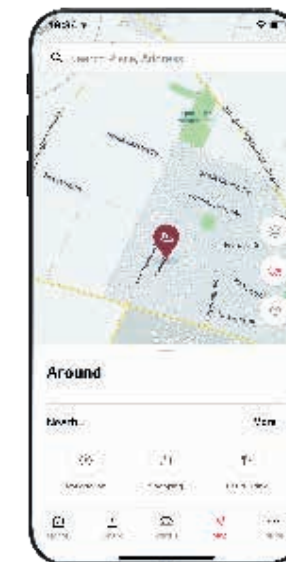

Activate the valet mode in your car so you can track its location and speed on the app. Ideal when you lend your vehicle to a valet service.

#### Charge scheduling (plug-in hybrid and electric vehicles only)

Use your phone to monitor and schedule charging sessions. This way, you can take advantage of cheaper off-peak rates, and ensure your car is ready when you need it.

#### Climate control scheduling (electric vehicles only)

You can pre-condition the cabin prior to a desired departure time. Not only is it very comfortable but it also ensures the right temperature is reached in the most energy-efficient way.

Kia Connect (UVO) services are available free of charge for a period of seven years commencing on the day the vehicle is sold to the first owner of the vehicle and may be subject to change during that period. You need a smartphone with iOS™ or Android™ operating system and your own data plan to operate the Kia mobile application. Your Kia needs to be in a location with Vodafone mobile signal to connect to these services.

# The right position can help everyone arrive refreshed.

The Niro is built for versatility, and the driver and passengers will discover an uncommonly relaxing and refreshing experience. Firm, supportive seats, plenty of space to move about, and helpful features make the journey enjoyable and productive. The driver's seat offers ample adjustment to support a healthy, attentive driving posture, and both front seats can be heated and ventilated.

Unusually spacious for a hybrid, with ample headroom, shoulder space and legroom, the Niro's interior invites you to stretch out and relax. Surrounded by clean, modern and high-tech design accents, it's easy to feel at home here right from the start.

**8-way power driver's seat.** To help make driving as comfortable and effortless as possible, the 8-way power driver's seat adjusts vertically, fore aft and for tilt and lumbar support.

**Heated steering wheel.** Make driving more civilised on cold days and stay focused on the demands of driving with the optional heated steering wheel.

**Ventilated front seats/Smart control system for heated seats.** Ventilated front seats provide cooling airflow on hot days. Heated seats include a smart control system that progressively lowers the heating of the front passenger seat over time to help protect infants and elderly passengers from potential burns.

**Integrated Memory System.** Sharing a vehicle doesn't have to mean readjusting the driver's seat and side mirrors every time you get in after someone else has driven. To help keep everyone feeling right at home at the wheel, the IMS stores seat and side mirror preferences for two drivers.

# A roomier, more versatile approach to hybrid life.

The Niro keeps your options wide open with plenty of space - and clever ways to configure it. The generous interior dimensions give both you and your passengers plenty of headroom and legroom, while a sizeable cargo space takes care of all your luggage.

**Cargo capacity.** Even when all the seats are occupied, the Niro can carry an impressive amount of cargo. That means you can handle road trips, big shopping days and sporting events, and still have room for family and friends. When the seats are folded, you'll enjoy 1,425 litres of capacity on the Self-Charging Hybrid, 1,322 litres on the Plug-In Hybrid, and 1,405 litres on the e-Niro.

**Fully folding, split rear seats.** The rear seat backs split 60:40 and fold completely flat for maximum cargo capacity and flexibility. Take advantage of all the choices to accommodate more combinations of passengers and cargo. Because the seat backs fold flat, the cargo area can accommodate large boxes or a stack of flat items.

Cargo screen.

Underfloor box for storage.

60:40 split-folding rear seats.

**Interior flexibility.** The Niro's interior is flexible enough to support a truly active lifestyle. It's equally well equipped for a night on the town, a day in the country or a week on the road. Seat backs fold flat so longer items can fit while valuables can be stowed safely out of view.

# DriveWise technologies for convenience and safety

Kia's DriveWise technologies are designed to deliver driving pleasure and the utmost in passenger and pedestrian safety.

**Lane Keeping Assist.** This system uses a forward-looking camera to detect the edges of the driving lane, and automatically assists the steering to help the driver stay squarely within the intended lane.

**Lane Following Assist.** To make your journey more enjoyable, the Lane Following Assist monitors road markings to keep your car in the centre of your lane.

**Forward Collision-Avoidance Assist.** Using both camera and radar data, Forward Collision-Avoidance Assist can detect a potential collision with a vehicle, pedestrian or obstacle ahead of you. It warns you and can even apply the brakes to avoid or minimise a collision.

**Intelligent Speed Limit Warning.** The Intelligent Speed Limit Warning function helps you stay within the speed limits. Using the camera on the windscreen, it reads speed limits and overtaking restrictions, and displays the information clearly on the navigation screen and cluster.

**Blind-Spot Collision Warning.** Blind-Spot Collision Warning uses sensors to monitor the side and rear of the vehicle. Using visual and audible alerts, it informs you about vehicles in the blind spot or those attempting to overtake (grade dependent).

**High Beam Assist.** A camera fitted on the windscreen looks out for oncoming vehicles at night and automatically switches your headlights to low beam to avoid blinding them. Once the oncoming car has passed, high beam is switched back on.

**Rear Cross Traffic Collision Warning.** This system warns you if it detects any cross traffic when you back out of a parking space or driveway.

**Front and rear parking sensors.** For confident manoeuvring, parking sensors warn of any obstacles in front of or behind your car (grade dependent).

**Driver Assistance System.** Designed to help you save energy, the Kia Niro lets you know when you can start coasting e.g. when it anticipates a roundabout or toll gate. It pre-charges the battery before tackling an incline and pre-emptively discharges it before going downhill, making the best use of the available battery charge and engine capacity (grade dependent).

**Smart Cruise Control with Stop & Go.** Smart Cruise Control can regulate the Niro's speed based on a set speed and your chosen safe distance to the vehicle ahead. If the vehicle ahead picks up the pace, the Niro accelerates up to the set speed. If the vehicle in front slows down and the predetermined safe distance cannot be maintained, the system reduces the speed, or even stops the car.

# All mod cons.

The Kia Niro offers an impressive range of comfort and convenience features throughout the range.

**JBL sound system.** A state-of-the-art sound system includes an external amplifier, JBL speakers and innovative Clari-Fi™ music restoration technology that improves the sound quality of compressed music files to deliver high-definition sound (grade dependent).

**Bluetooth.** Communicate and stream content wirelessly, with minimal distraction using paired Bluetooth®-compatible devices.

**Steering wheel remote control.** Keep your eyes on the road. Steering wheel-mounted controls let you adjust the audio, activate voice recognition, take or end calls, set speed limits and access menus in the supervision cluster.

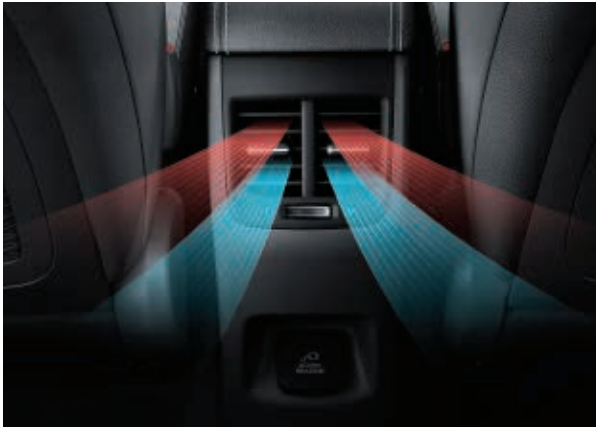

**USB ports.** Connect your smartphone via the USB port to charge or to use Android Auto™/Apple CarPlay™.

**10.25" Touchscreen Navigation.** The vivid, easy-to-use 10.25" colour touchscreen audio includes useful features such as DAB radio and the display for the rear-view camera (grade dependent).

**Auto defogger system.** Sensors detect any condensation forming inside the front windscreen and automatically turn on the defogger for maximum visibility and safety.

**Rear console vent.** Rear-seat passengers are always comfortable thanks to the vents mounted at the rear of the centre console.

**Roof rack/sunroof.** Carry sporting goods and other cargo securely on the roof rack. A power sunroof opens or closes at the press of a button to let in sunshine and fresh air (grade dependent).

**Dual automatic air conditioning.** It automatically turns the air conditioner and heater on and off to maintain separate driver and front passenger temperatures.

**Automatic light control.** Set the stalk to Auto and the headlights and tail lights come on automatically at dusk or in dark places.

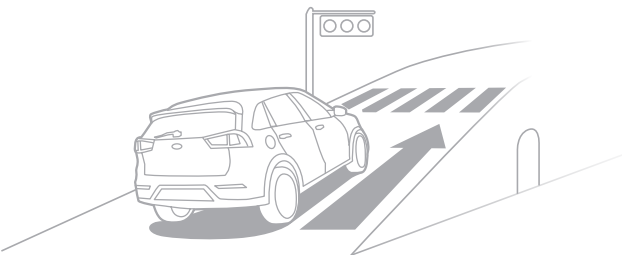

# Technology for peace of mind.

From the advanced materials of its body and their placement, to the incorporation of the latest, most vigilant and most proactive driver assistance systems, safety is paramount in the Niro.

**Electronic Stability Control (ESC).** ESC ensures optimal braking performance and directional control by automatically delivering the right amount of braking force to each wheel based on an evaluation of engine torque and driving conditions.

**Hill-Start Assist Control.** At a standstill on an incline, it prevents you from rolling backward by gently applying the brakes for up to two seconds as your foot goes from the brake to the accelerator.

**Advanced High-Strength Steel (AHSS) and hot-stamped steel.** The Kia Niro uses more than 53 % Advanced High-Strength Steel (AHSS), resulting in phenomenal rigidity. And hot-stamping of components is applied to 24 parts in stress areas. These measures greatly improve body strength, enhancing cabin protection and improving dynamic performance.

**Aluminium body elements (bonnet/ tailgate).** While critical points use more high-strength steel than ever, aluminium is used in the bonnet and tailgate to help reduce weight by as much as 11 kg for better handling and fuel economy.

Images shown are for illustrative purposes only and not to UK specification. Features are not necessarily standard across the range.

**7 Airbags.** To help protect occupants and potentially reduce injuries in the event of a collision, the Niro offers driver and front passenger airbags, two front-side airbags, two side-curtain airbags and a driver's knee airbag as standard.

**Driver Attention Warning.** The system detects if you're losing concentration by monitoring your steering wheel, turn signal and acceleration pattern. If you're showing signs of drowsiness, it reminds you to take a break with an audible warning and visual cue in the cluster.

# The outdoor world awaits you.

Kia genuine accessories are custom-designed and engineered to enhance the look and feel of the Kia Niro. Built to meet the highest standards of quality and style, these premium accessories are the ultimate way to compliment your car and support all your outdoor activities.

**Dog guard.** Easier transportation for passengers and pets alike. This robust grid is easy to install and fits perfectly between the rear seatbacks and roof, without restricting the drivers rear view. Available for Hybrid and Plug-In Hybrid vehicles only.

**Boot liner.** However wet, muddy or grimy things get, this custom-made liner will protect your boot area. It is durable, anti-slip and waterproof with raised edges. Designed to complement the interior of your car, the textured anti-slip surface helps prevent loads moving around and features the Niro logo. Available for Hybrid, Plug-In Hybrid and Electric vehicles.

**Velour carpet mats.** Keep your cabin unblemished for longer. These high-quality velour carpet mats will protect your Niro's interior from everyday dirt and enhance its look at the same time. Tailor-made to fit the footwells perfectly, they feature the Niro logo in the front row and are held in place with fixing points and anti-slip backing. Available for Hybrid, Plug-In Hybrid and Electric vehicles.

**Cross bars, aluminium.** Light and easy to install, these strong and perfectly fitting aluminium cross bars will help you to transport all you could possibly need on your next adventure. Available for Hybrid, Plug-In Hybrid and Electric vehicles.

**Tow bar, detachable.** Detachable and above all dependable, whenever you have substantial cargo in tow, this corrosion resistant steel tow bar is ideal for efficient transportation. Available for Hybrid and Plug-In Hybrid vehicles only.

# 10 more reasons to join our Kia family

Now there are even more reasons to buy a stylish, technology packed Kia. Peace of mind comes as standard when you join the Kia family with the Kia Promise - 10 great owner benefits when you buy your Kia and register at MyKia.

There are a lot of things to consider when buying a new car. Compromising on reliability in the long term shouldn't be one of them. That's why Kia have redefined quality and offers a unique, industry-leading 7 year or 100,000 miles warranty for your peace of mind.

Our Driveaway Insurance has you covered from the minute you leave the Dealership. We will also give you a £250 Excess Return Voucher which pays you back regardless of who you are insured with providing you call Kia Accident Aftercare before you call your insurance company. We will also provide you with a competitive quote for your annual cover.

Our 24/7 Roadside Assistance package is designed for Kia owners in partnership with the RAC. All new cars have complimentary cover for 12 months from the first date of registration. If you register on MyKia, you can unlock Kia Roadside Assistance Plus, giving you the highest level of cover provided by the RAC, including onward travel and European cover.

Order Genuine Kia accessories, where and when you need them! Our Click & Collect service offers choice and convenience, recognising your model from the registration number to ensure you get exactly what you need. Then simply collect at your nearest Dealer, where they can fit them too.

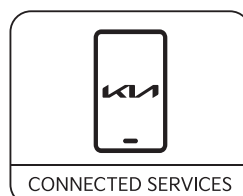

Online service booking offers convenience and flexibility 24/7. Offering quality and value at one of our Dealers nationwide. Kia trained technicians use the latest diagnostic equipment and technology. All of our Genuine Kia parts come with a 2 year warranty. Fully inclusive pricing at the click of a button.

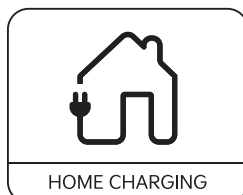

When you own a Kia, you become part of the family and benefit from a relationship based on trust and transparency. When you visit one of our dealers for a service, your vehicle will benefit from a complimentary Health Check, a wash and vacuum and alternative transport if needed. Welcome to the Kia family!

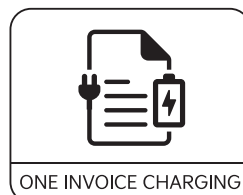

Available to all Kia owners, whoever your insurer and whatever the circumstances, Kia Accident Aftercare will take care of things for you. We will liaise with your insurer, provide a free courtesy car and ensure your car is repaired at a Kia Approved Bodyshop using Kia repair methods and original parts.

Kia offers you free seven-year connected services with Kia Connect. Once activated in your vehicle, Kia Connect enables a number of digital features in your car like real-time traffic data. You can also install the Kia Connect app on your smartphone and pair it with your Kia to interact with your vehicle in new ways.

We have partnered with Pod Point and bp pulse so you can quickly and conveniently charge your electric or plug-in hybrid Kia at home.

Kia Charge makes public charging easy. Kia Charge is the only solution you need to charge your electric or plug-in hybrid Kia across multiple networks in the UK and Europe.

## Kia Care Service Plans

For complete peace-of-mind, Kia can offer you a great value fixed-price servicing package for your Niro which is called Kia Care. Please speak to your Kia dealer for more information and pricing. Terms and conditions apply.

Log onto [www.kia.com/uk](http://www.kia.com/uk) for details.

## 5-year paint warranty & 12-year anti-perforation warranty

High-quality body paint ensures long-lasting protection and shine for your New Kia. It also comes with superior corrosion protection and a 12-year warranty against rust from the inside out.

## Financing

Your local Kia dealer can help you with a financing plan that's best suited to your needs. Log onto [www.kia.com/uk](http://www.kia.com/uk) for more details.

**7-year vehicle warranty.** Every Kia benefits from a 7-year/100,000 miles new car warranty (up to 3 years unlimited; from 4 years 100,000 miles). This bumper-to-bumper warranty is free and transferable to subsequent owners, provided the car is regularly maintained in accordance with the servicing schedule. (Terms and exclusions apply)

**Kia 7-year EV/HEV/PHEV Battery Warranty.** When you switch to a Kia Electric (EV), Hybrid Electric (HEV) or Plug-In Hybrid (PHEV), it's good to know that our batteries are built to have a long life\*. That's why at Kia we are happy to cover you for 7-year or 100,000 miles whichever comes first. Even for our low voltage (48 V and 12 V) batteries in Kia Mild-Hybrid electric vehicles (MHEVs), our Kia warranty covers you for a period of 2 years from initial registration regardless of mileage. All of which means you can simply enjoy the experience of driving our eco-friendly range, every day for years to come.

\*Kia high voltage lithium ion battery-units in electric vehicles (EV), hybrid electric vehicles (HEV) and plug-in hybrid electric vehicles (PHEV) are built to have a long life. These batteries are covered by the Kia warranty for a period of 7 years from initial registration or 100,000 miles, whichever comes first. For EVs and PHEVs Kia guarantees a minimum 70% capacity of the battery. Capacity reduction of the battery in HEV and MHEV is not covered by the warranty.

To minimise capacity reduction, follow the instructions consult the Owner's Manual. Find more information about Kia warranty at [www.kia.com/uk](http://www.kia.com/uk)

\*For full terms, conditions and exclusions please visit [kia.com/uk](http://kia.com/uk)

Fully unlock these benefits when you register at **MyKia**
